

**„8 mm is the benchmark!“**

The slim monitor of the BLADE 125 table with a 12.5" screen diagonal produces a crystal-clear FullHD image – and at a depth of just 8mm it is almost as sharp as a blade. Milled aluminium and black acrylic glass underscore the elegant and stylish lines of this unique table monitor. With the BLADE 125 table from ELEMENT ONE, design perfectly follows concept: It is an outstanding piece of technology to look at and touch.
